Analyzing the Ecosystem for Women Entrepreneurs: A Case Study of Rural Areas of Jamshoro, Pakistan

Authors: Aisha M. Memon, Arabella Bhutto, Zahid A. Memon, Adnan Pitafi

Abstract: This study aims to identify the existing and non-existing elements in the entrepreneurial ecosystem which include finance, institutions, laws and regulations, human capital, culture, and markets, to measure the level of effectiveness of existing elements and to develop recommendations for improving the ecosystem to facilitate the women entrepreneurs in Jamshoro, Pakistan. The nature of this study is qualitative. Data were drawn from 25 in-depth, semi-structured interviews and a focus group discussion with women entrepreneurs in rural Jamshoro, Pakistan. The findings show the lack of awareness and knowledge among women entrepreneurs about available financial resources, lack of knowledge about laws, an absence of familial and societal support for women in accessing the entrepreneurial ecosystem, the absence of business and innovation enablers in rural areas, communication gaps, and unskilled human capital. The study found that institutions like non-for-profit organizations are playing an active role in the growth of women entrepreneurs. The existing entrepreneurial ecosystem in Jamshoro can be improved through culturally sensitive coordinated approach, interventions aimed at increasing awareness about the resources, promoting an understanding about the laws and regulations, making business enablers more effective, establishing public-private partnerships, and providing the women entrepreneurs easy access to market and financial resources.

Keywords: entrepreneurship, entrepreneurship ecosystem, Pakistan, women entrepreneurs
