The Implementation of Animal Welfare for Garut Sheep Fighting Contest in West Java

Authors: Mustopa, Nadya R. Susilo, Rhizal D. Nuva

Abstract: This study aims to determine the application of animal welfare in Garut sheep fighting contest at West Java. This study conducted by survey and discussion methods with 5 Garut sheep owners in the contest. The animal welfare is going to be proved by observing the condition of the cage, the cleanliness of it, the health of the sheep, feeding and water, also owner treatments for their sheep that will be served as a fighter. Observations made using stable conditions ACRES form with assessment scores ranged from 1 = very poor, 2 = poor, 3 = regular, 4 = good and 5 = very good, animal welfare conditions seen by conducting observations and interviews with garut sheep owners. The result shows that the Garut sheep fighting contest has fulfilled the criteria of animal welfare application. Application of animal welfare principle by the owner of Garut sheep terms of ACRES (Animal Concerns Research and Education Society) below standard, the average score obtained was 1.76 which is mean in a very bad ratings. Besides considering the animal welfare application, sheep owners also do special treatments for their Garut sheep with the purpose to produce fighters that are healthy and strong. So, if the sheep wins in Garut sheep fight contest, it will purchase a high-value prices.
