

CALL FOR PAPERS

ICSWRM 2016
Feb 25-26, 2016
London, United Kingdom

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICSWRM 2016 : International Conference on Sustainable Water Resources Management is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Sustainable Water Resources Management. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Water management and planning
Wastewater treatment and management
Water markets and policies
Urban water management
Water quality
Climate Change and Global Warming
Impacts of Climate Change on Water Resources Management
Assessment of Current and Future Vulnerability of Water Resources
Storm water management
Water security systems
Hydrological modelling
Flood risk
Water management and planning

Hydrological modelling
Waste water treatment and management
Groundwater flow problems and remediation
Irrigation problems
Water markets and policies
Urban water management
Decision support systems
Pollution control
Water systems (water saving, suitable quality versus usage, greywater/blackwater segregation, wastewater treatment, reuse and recycling) for small rural communities, remote tourist facilities, and peri urban areas
Household-centred water management
Rainwater harvesting for domestic use
Industrial water management and cleaner production (segregation, pre-treatment of industrial wastewater and reuse)
Integration of wastewater reuse in the overall water resources management
