

CALL FOR PAPERS

ICUAS 2017
May 14-15, 2017
Amsterdam, The Netherlands

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICUAS 2017 : International Conference on Unmanned Aircraft Systems is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Unmanned Aircraft Systems. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Air Vehicle Operations
Air traffic control and management
Aircraft onboard intelligence
Airspace Control
Airspace Management
Airworthiness
Autonomy, automation and robotics
Biologically Inspired UAS
Biologically inspired unmanned aircraft systems
Certification
Communication systems for unmanned aircraft systems
Control Architectures
Energy Efficient UAS

Energy efficient unmanned aircraft systems
Environmental Issues
Fail-Safe Systems
Frequency Management
Integration
Intelligent flight planning and control
Interoperability
Levels of Safety
Manned/Unmanned Aviation
Manned/unmanned aviation
Micro- and Mini- UAS
Micro- and mini- unmanned aircraft systems
Military and civil applications
