

CALL FOR PAPERS

ICUST 2019
Aug 22-23, 2019
Budapest, Hungary

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICUST 2019 : International Conference on Underground Space Technology is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Underground Space Technology. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Site investigations and rock mass characterization
Stress regime around underground openings
Testing of rocks to determine their physic-mechanical properties
Tunneling methods/ Methods of excavation
Design methodologies, with emphasis on numerical modeling
Rock reinforcement and ground improvement

Instrumentation and monitoring
Hazard assessment and analysis
Environmental management
Geology and Geophysics
Other peripheral issues
