

# CALL FOR PAPERS

**ICBTWN 2019**  
**Nov 04-05, 2019**  
**Amsterdam, The Netherlands**

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICBTWN 2019 : International Conference on Broadband Technologies and Wireless Networks is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Broadband Technologies and Wireless Networks. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Wireless networks and broadband technologies  
3G, 4G, and beyond systems  
Ad-hoc networks  
Cognitive radio networks  
Cross-layer schemes and optimizations  
Data fusion in wireless sensor networks  
Energy and power management in wireless systems  
Experimental wireless systems and trials  
Interworking heterogeneous wired/wireless networks  
Location-based services and tracking  
Multi-hop and cooperative communications  
Multi-hop wireless networks  
Multimedia delivery over wireless networks

Next generation wireless systems  
Performance evaluation of wireless systems and protocols  
Resource management and admission control  
RFID protocols and systems  
Security and privacy in wireless systems  
Security in wireless sensor networks  
Ultra wide-band systems  
Vehicular networks  
Wireless internet and All-IP integration  
Wireless LANs and PANs and WiMAX  
Wireless MAC protocols: design and analysis  
Wireless mesh networks  
Wireless network testbeds and applications
