

# CALL FOR PAPERS

**ICUWP 2019**  
**Nov 18-19, 2019**  
**Singapore, SG**

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICUWP 2019 : International Conference on Urban Wildlife Populations is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Urban Wildlife Populations. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

- |                                                                           |                                                                    |
|---------------------------------------------------------------------------|--------------------------------------------------------------------|
| Urban wildlife ecology                                                    | Urban green spaces                                                 |
| Urban wildlife and urban environments                                     | Urban wildlife species                                             |
| Wildlife management in urban areas                                        | Urban threatened, endangered and extirpated species                |
| Urban wildlife ecology and conservation                                   | Wildlife ecology and management                                    |
| Natural resources management                                              | Different types of urban areas support different kinds of wildlife |
| Wildlife damage management                                                | Urban effects on the urban wildlife                                |
| Habitat, food, water, cover or shelter                                    | Biodiversity and urbanization                                      |
| Management and control                                                    | Changes in diversity                                               |
| Wildlife conservation                                                     | Cause of diversity change                                          |
| Urban wildlife populations                                                | Urban wildlife research                                            |
| Urban wildlife problems                                                   | Regulation of hunting activity                                     |
| Traditional and alternative methods of human-wildlife conflict management | Wildlife law                                                       |
| Urban habitats and hazards                                                | Future directions                                                  |
