

# CALL FOR PAPERS

**ICRCN 2019**  
**Nov 12-13, 2019**  
**Venice, Italy**

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICRCN 2019 : International Conference on Reliability of Communication Networks is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Reliability of Communication Networks. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

- |  |  |
|--|--|
| Network reliability                            | Performability measures                              |
| Reliability models, measures, and analysis     | Critical issues in reliability modeling and analysis |
| Network reliability and resilience             | Multilayer modeling and analysis                     |
| Reliability analysis of communication networks | Designing reliable networks                          |
| Connectivity measures                          | Deterministic and probabilistic models               |
| Maxflow measures                               | Terminal reliability                                 |
| Multicommodity flow measures                   | Biconnected networks                                 |
