

# CALL FOR PAPERS

**ICICT 2019**  
**Dec 04-05, 2019**  
**Tokyo, Japan**

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICICT 2019 : International Conference on Information and Coding Theory is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Information and Coding Theory. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Source coding, space time coding  
Detection and estimation theory  
Information and differential  
entropy  
Channel capacity, input-constrained  
channels  
Kolmogorov complexity, quantum  
information science  
Codes  
construction/existence/analysis  
Information algebra/geometry

Non-existence results for codes,  
bounds for codes/designs  
Decoding algorithms  
Algebraic combinatorics  
Network coding and lattice theory  
Wireless/multimedia applications,  
mobile communication channels  
Computational complexity,  
cryptography  
Communication combinatorial  
problems
