

# CALL FOR PAPERS

**ICOSDA 2019**  
**Dec 04-05, 2019**  
**Tokyo, Japan**

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICOSDA 2019 : International Conference on Offshore Structure Design and Analysis is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Offshore Structure Design and Analysis. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Offshore construction  
Offshore development  
Offshore construction design and management  
Types of offshore structures  
Steel template structures  
Concrete gravity platforms  
Compliant structures  
Floating structures  
Subsea system  
Offshore construction materials and corrosion  
Design of offshore steel structures

Structural design of offshore units  
Dynamic and fatigue analysis  
Marine structures and contracts  
Interaction of design and construction  
Environmental aspects of marine and offshore construction  
Highway, rail, barge, and air traffic  
Protection of existing structures  
Materials and fabrication for marine structures  
Steel structures for the marine environment  
Marine and offshore construction equipment
