

CALL FOR PAPERS

ICNGFB 2019
Dec 26-27, 2019
Vienna, Austria

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICNGFB 2019 : International Conference on Next-Generation Feedstocks and Biofuels is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Next-Generation Feedstocks and Biofuels. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Next-generation technologies and feedstocks
Next-generation biomass feedstocks for biofuel production
Genetic and environmental manipulation of biomass feedstocks for improved conversion traits
Analytical methodologies for characterization of feed stocks in the laboratory or field
Development of captive, waste-based, and alternative feedstock conversion technologies

Biogas, syngas, CO₂ fixation, natural gas, and other non-biomass derived feedstocks
Comparative analyses or evaluation of the performance different feedstocks in preprocessing and/or conversion processes
Geology, geographic, climate, and soil impacts on biomass recalcitrance
Enhanced agricultural, silvicultural and land-use practices for growing and harvesting renewable feedstocks more efficiently
Harvesting, storage, pre-processing and transportation of feedstocks, particularly in supply logistics for commercial plants
