

CALL FOR PAPERS

ICSTIES 2019
Dec 26-27, 2019
Vienna, Austria

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICSTIES 2019 : International Conference on Soil Treatment, Internal and External Stability is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Soil Treatment, Internal and External Stability. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Soil treatment	
Soil reinforcement	
Geosynthetics for soil reinforcement	
Mechanics of reinforced soil	
Soil reinforcement techniques	
Benefits of reinforced soil	
Applications of soil reinforcement	
Soil retaining structures	
Geosynthetic soil reinforcement testing procedures	
Soil reinforcement and geosynthetics	
Use of coir fibers for sustainable development	
Soil nailing	
Field tests on geosynthetic reinforced unpaved roads	
	Reinforced soil structures
	Woven geotextiles
	Polymer geogrids of polyethylene
	Polyester and fiberglass geogrids
	Steel strips
	Reinforced slopes and embankments
	Reinforced foundations
	Mechanically-stabilized earth
	Limit equilibrium analysis
	Jewell's method for geogrid reinforcement
	Generic method for reinforced soil structures
	Internal stability
	External stability
