

# CALL FOR PAPERS

**ICGMMEM 2020**  
**Jan 30-31, 2020**  
**Dubai, UAE**

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICGMMEM 2020 : International Conference on Geological Methods in Mineral Exploration and Mining is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Geological Methods in Mineral Exploration and Mining. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Mineral exploration  
Mineral research and explorations  
Geophysics for mineral exploration and mining  
Mining and mineral engineering  
Mining geology  
Mining geology and exploration  
Mining and mineral process  
Mining exploration methods  
Role of exploration in mining  
Heavy minerals in exploration  
Sequential exploration model  
Onshore and offshore exploration

Mineral exploration and drilling  
Mine planning and mineral processing  
Hydrometallurgical process minerals  
Mineral exploration and mining technologists  
Distal footprints of minerals systems  
Ore deposits associated with mafic-ultramafic layered intrusions  
3D modelling of muggety gold deposits  
Tiny termite prospectors  
AEM applied to mineral exploration  
Mineral inclusions in magnetite  
Applications of Raman Spectroscopy to mineral exploration
