

CALL FOR PAPERS

ICTAE 2020
Jan 30-31, 2020
Dubai, UAE

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICTAE 2020 : International Conference on Therapeutic Antibody Engineering is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Therapeutic Antibody Engineering. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

- | | |
|--|--|
| Antibody engineering | Bi specific antibodies and combination therapy |
| Synthetic antibody library design | Antibodies for cancer therapy |
| Antigen-designed antibody libraries | Human antibody gene libraries |
| High-throughput antibody generation | Synthetic antibody libraries |
| Engineering bi-specific antibodies | Antibody engineering and modification technologies |
| Phage and yeast display of antibodies | Antibody therapeutics and targets |
| New technologies and trends in antibody research | Antibody fragments and non-immunoglobulin scaffolds |
| Advances in antibody drug and therapy | Expression systems, glycosylation, and protein heterogeneity |
| Antibody design, engineering and production | Pharmacokinetics |
