

CALL FOR PAPERS

ICFRM 2020
Jan 30-31, 2020
Istanbul, Turkey

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICFRM 2020 : International Conference on Forest Regeneration and Methods is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Forest Regeneration and Methods. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Forest restoration and regeneration
Forest regeneration and ecosystem
Ecological knowledge
Biodiversity-productivity relationships
Mixed forests
Competition and facilitation
Plant-plant / plant-animal /plant-fungus interactions
Regeneration dynamics and natural regeneration
Eco-techniques for plant protection and establishment
Understanding seedling establishment
Genetics and restoration under global change
Seedling quality
Plant production

Producing stress-tolerant seedlings
Site preparation for restoration
Direct seeding
Protection from browsing animals
Restoring forests after wind and fire regimes
Large scale forest restoration efforts following pests and diseases
Restoration of forest landscapes following anthropogenic disturbances
Assessing the effects of forest restoration
Cost-effective forest restoration
Forest adaptation and restoration
Forest restoration for biodiversity conservation
Retention forestry
Forest policy for restoration
