

CALL FOR PAPERS

ICDCSAD 2020
Jan 20-21, 2020
London, United Kingdom

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICDCSAD 2020 : International Conference on Distributed Control Systems, Analysis and Design is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Distributed Control Systems, Analysis and Design. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

- Distributed control systems
- Nonlinear optimization
- Large-scale optimization
- Design of communication networks to support distributed control/optimization
- Computer network
- Programmable logic controllers
- Commercial distributed control systems
- Distributed control of networked agent systems
- Distributed cooperative control of multiagent systems
- Synchronization in complex networks
- Pinning control of large-scale coupling systems
- Collective behaviors in complex networks
- Cooperative control with uncertain/stochastic disturbances
- Control of networked agent systems
- Distributed optimization of multiagent systems
- Distributed energy management systems
- Distributed control in smart grids
- Distributed voltage control
- Distributed control of unmanned underwater vehicles
- Distributed control of cyberphysical systems
- Distributed security control of complex networks
- Local control unit
- Data acquisition unit
- Batch sequencing unit
- Local display
- Bulk memory unit
