

# CALL FOR PAPERS

**ICDEA 2020**  
**Jan 20-21, 2020**  
**London, United Kingdom**

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICDEA 2020 : International Conference on Dendrochronology and Ecological Amplitude is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Dendrochronology and Ecological Amplitude. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

- |   |  |
|---|--|
| Dendrochronology                          | Limiting factors                                 |
| Tree-ring dating                          | Climate change                                   |
| Analysis of patterns of tree rings        | Standardization                                  |
| Dendrochronology and environmental change | Characteristic patterns of wide and narrow rings |
| Growth rings                              | Tree-ring growth patterns                        |
| Dendrochronological analysis              | Sampling and dating                              |
| Crossdating                               | Reference sequences                              |
| Chronology building                       | Direct indicator approach                        |
| Sensitivity                               | Physical measurement approach                    |
| Replication                               | The grid approach                                |
| Site selection                            | Applications                                     |
| Ecological amplitude                      | Radiocarbon dating calibration                   |
| Aggregate tree growth                     | Climatology                                      |
