

# CALL FOR PAPERS

**ICFCS 2020**  
**Jan 20-21, 2020**  
**London, United Kingdom**

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICFCS 2020 : International Conference on Food Composition and Structure is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Food Composition and Structure. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Advanced biotechnological and nanoscience developments and applications in food research  
Bioactive compounds ingredients and technologies  
Consumer attitudes to food and risk assessment.  
Food allergies and intolerances  
Food function and relationships between diet and disease  
Food and health  
New developments in food engineering  
Rapid techniques for online control  
Novel processing and packaging technologies  
Quality assurance methods and application of -omics techniques

Risk assessment of both biological and non-biological hazards in food  
Food safety, analysis and control  
Prevention of microbial and chemical contaminants in food  
New paths for targeted food processing  
Design of new and re-evaluation of traditional techniques and ingredients  
Non-thermal technologies and process combinations  
Analytic approaches and mechanistic insights  
Food composition, structure design, digestion and ingredient bioavailability  
Sensor technology and quality monitoring during processing and storage  
Modeling and simulation of food matrix properties and processing technologies
