

CALL FOR PAPERS

ICPSOM 2020
Jan 20-21, 2020
London, United Kingdom

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICPSOM 2020 : International Conference on Precipitation Science, Observations and Modeling is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Precipitation Science, Observations and Modeling. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Precipitation science
Observations, retrievals, and modeling
Precipitation and hydrological applications
Weather forecasting and prediction
Precipitation simulation models
Precipitation modeling and quantitative analysis
Statistical analysis and modeling of precipitation data

Measurement, climatology, remote sensing, and modeling
Global precipitation measurement
Precipitation types
Precipitation formations
Causes of precipitation
Precipitation measurements
