

# CALL FOR PAPERS

**ICSCMC 2020**  
**Jan 30-31, 2020**  
**New York, USA**

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICSCMC 2020 : International Conference on Soft Computing, Mathematics and Control is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Soft Computing, Mathematics and Control. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Abstract Algebra and Applications  
Adaptive control  
Agriculture, environment, health applications  
Algorithms  
Applications of modelling in science and engineering  
Artificial Neural Networks (ANN)  
Computational Complexity  
Computer modelling  
Control theory  
Differential Geometry  
Digital control  
Discrete Mathematics  
Embedded systems

Evolutionary algorithms  
Fault detection and isolation  
Feedback control  
Functional Analysis  
Fuzzy logic and applications  
Fuzzy set theory  
Genetic Algorithms  
Genetic algorithms and evolutionary computing  
Graph Theory and Applications  
Hybrid systems  
Industry, military, space applications  
Linear and nonlinear control systems  
Linear and Nonlinear Programming
