

CALL FOR PAPERS

ICWCAP 2020
Jan 30-31, 2020
New York, USA

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICWCAP 2020 : International Conference on Wireless Communications, Antennas and Propagation is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Wireless Communications, Antennas and Propagation. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Active antennas	Multi-band and UWB antennas
Antennas and arrays for security systems	OFDM and multi-carrier systems
Channel modeling	Propagation through forested areas
Channel sounding techniques for MIMO systems	Radio astronomy (including SKA)
Cognitive radio	RFID technologies
Communication satellite antennas	Signal processing antennas and arrays
DOA estimation	Small mobile device antennas
EMC in communication systems	Smart antennas and arrays
Emergency communication technologies	Space-time coding
Indoor and urban propagation	Vehicular antennas
Low-profile wideband antennas	Wireless mesh networks
MIMO systems	Wireless security
Mobile networks	Wireless sensor networks
