

CALL FOR PAPERS

ICEGG 2020
Jan 16-17, 2020
Rome, Italy

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICEGG 2020 : International Conference on Experimental Geophysics and Geology is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Experimental Geophysics and Geology. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Experimental geophysics
Experimental techniques in mineral
and rock physics
High-pressure deformation
techniques in experimental
geophysics
Experimental geophysics for
groundwater studies
Electromagnetic methods in
experimental geophysics
Geophysics and marine geology

Experimental and explorative
geophysics
Rock physics and mechanics
Surface and borehole geophysics
Experimental design in geophysics
and methodology
Recent trends in experimental
geophysics
Experimental geophysics and case
studies
