

CALL FOR PAPERS

ICCETM 2020
Jan 30-31, 2020
Sydney, Australia

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICCETM 2020 : International Conference on Coastal Engineering, Technology and Management is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Coastal Engineering, Technology and Management. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Coastal engineering	
Coastal, harbour and offshore engineering	
Waves, currents and sediment transport	
Coastal, estuarine and offshore morphology	
Technical and functional design of coastal and harbour structures	
Morphological and environmental impact of coastal, harbour and offshore structures	
Applications of coastal engineering	
Mathematical and numerical modelling	
Laboratory and field observations and experiments	
	Coastal waves
	Nearshore currents
	Coastal structures
	Sediment transport
	Coastal morphology
	Beach nourishment
	Coastal management
	Design and planning of coastal works
