

CALL FOR PAPERS

ICUCTA 2020
Jan 30-31, 2020
Sydney, Australia

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICUCTA 2020 : International Conference on Ubiquitous Communication Technologies and Applications is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Ubiquitous Communication Technologies and Applications. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Ubiquitous communication technologies and networking
Modulation, coding, and diversity techniques
Millimeter-wave and terahertz communications
Multiple access techniques in wireless networks
Optical wireless access networks
Visible light communications and networks

Free space optical communications and networking
Power line communication technologies
Maritime, space and underwater communications
Beyond 4G and 5G communications
Heterogeneous and small-cell networks
Satellite communication and networks
