

CALL FOR PAPERS

ICPEBSD 2020
Jan 06-07, 2020
Tokyo, Japan

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICPEBSD 2020 : International Conference on Protein Engineering and Bacterial Surface Display is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Protein Engineering and Bacterial Surface Display. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Bacterial display
Bacterial surface display
Bioengineering
Protein engineering
In vitro protein evolution
History
Principle
Scaffold
Applications
Affinity-based screening

Antibody epitope mapping
Identification of peptide
substrates
Identification of cell-binding
peptides
Vaccine delivery
Comparison with phage display
Magnetic-activated cell sorting
Fluorescence-activated cell
sorting
Identification of enzyme
substrates
Flow cytometry or iterative
selection procedures
