

CALL FOR PAPERS

ICAIP 2020
Feb 06-07, 2020
Amsterdam, The Netherlands

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICAIP 2020 : International Conference on Artificial Intelligence and Programming is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Artificial Intelligence and Programming. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Artificial intelligence programming
Paradigms of artificial intelligence programming
Programming languages for artificial intelligence
Lisp
Early artificial intelligence programs
ELIZA
Building software tools
Symbolic mathematics
Low level efficiency issues
Logic programming
Compiling logic programs

Object-oriented programming
Knowledge representation and reasoning
Advanced artificial intelligence programs
Symbolic mathematics with canonical form
Expert systems
Line-diagram labeling by constraint satisfaction
Search and the game of othello
Introduction to natural language
Unification grammars
ANSI common lisp
Troubleshooting
