

# CALL FOR PAPERS

**ICBISIE 2020**  
**Feb 06-07, 2020**  
**Amsterdam, The Netherlands**

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICBISIE 2020 : International Conference on Business Information Systems and Information Engineering is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Business Information Systems and Information Engineering. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Big Data analysis	
Linked Data	
applications & usage of Big and Smart Data	business models for Web information integration and aggregation
Big Data optimization	linked open data
information retrieval from Big Data sources	location-aware and geography-centric information systems
data models for Big & Smart Data	wireless and mobile applications
business models for Big & Smart Data	multi-agent distributed systems
Business Intelligence tools	semantic web personalization
creation, learning, population, evolution and evaluation of ontologies	smart cities
ontologies for enterprise content management	ambient computing
natural language processing and cognitive science	RFID and localization techniques
semantic integration of heterogeneous semi-structured information sources	search over semi-structural Web sources
interoperability of heterogeneous information systems	Deep Web search and crawling
	data integration from Web information sources
	modelling and describing evolving data sources
