

# CALL FOR PAPERS

**ICNRTA 2020**  
**Feb 06-07, 2020**  
**Amsterdam, The Netherlands**

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICNRTA 2020 : International Conference on Nuclear Reactor Technologies and Assessment is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Nuclear Reactor Technologies and Assessment. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Nuclear reactor technology	Integrated technology assessment
Nuclear reactor technologies	methods
Nuclear reactor technology assessment	Fission
Nuclear reactor materials and applications	Heat generation
Nuclear reactor fuel elements	Cooling
Site specific considerations	Reactivity control
Grid integration	Electrical power generation
Nuclear plant safety	Early reactors
Technical characteristics and performance	Components
Nuclear fuel and fuel cycle performance	Reactor types
Radiation protection	Classification by type of nuclear reaction
Environmental impact	Nuclear fission
Plant and site security	Nuclear fusion
	Classification by moderator material
