

# CALL FOR PAPERS

**ICPECT 2020**  
**Feb 06-07, 2020**  
**Amsterdam, The Netherlands**

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICPECT 2020 : International Conference on Power Electronics Converter Topologies is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Power Electronics Converter Topologies. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Wind power grid connection issues under high penetration  
Power electronics control of wind turbine induction and permanent magnet generators  
Power electronics converter topologies and controls for wind turbine systems  
FACTS applications for wind power  
Modeling and simulation of wind power converters and wind power generators  
Residential/Rural applications and other small wind turbine systems  
Low wind-speed technologies

Wind forecasting for dispatching of distributed wind generation sources  
Islanding and protection capabilities  
Generator design for wind energy systems  
Energy storage technologies for use with wind generating sources  
Off shore wind power  
PMUs / Wide Area Monitoring  
Protection and Control for wind integration
