

CALL FOR PAPERS

ICAFP 2020
Feb 10-11, 2020
Barcelona, Spain

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICAFP 2020 : International Conference on Adaptive and Functional Polymers is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Adaptive and Functional Polymers. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Functional polymers
Polymer synthesis and reactions
Synthesis of functional polymers
Characterization of functional polymers
Devices and applications of functional polymers
Paints, coatings and adhesives
Polymer blends, compounding and mixing
Processing and characterization techniques
Smart and multi-functional polymeric materials and devices
Mould making and product design
Nanostructured polymers
Rheology and processing
Industrial applications

High performance polymers
Green polymeric materials and technology
Rubber processing and technology
Functional polymers and composites: materials, devices and allied applications
Corrosion protection
Sensors and electromechanical devices
Batteries
Electrochromic cells
Controlled-release applications
Radar applications
Infrared polarizers
Third-order non-linear optical polymers
LEDs
