

CALL FOR PAPERS

ICAIWCMC 2020
Feb 10-11, 2020
Barcelona, Spain

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICAIWCMC 2020 : International Conference on Artificial Intelligence in Wireless Communications and Military Communications is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Artificial Intelligence in Wireless Communications and Military Communications. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Non-linear effects in wireless transceiver design
Wireless network resource allocation
IoT and other specialized network design
Localization of wireless devices
Detection and prevention of cyber-security attacks at the wireless network edge

Military communications
AI techniques suitable for online training
Systematic design and adaptation of AI parameters in a dynamic setting
Novel practical applications of AI in wireless communications
