

CALL FOR PAPERS

ICAMOC 2020
Feb 10-11, 2020
Barcelona, Spain

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICAMOC 2020 : International Conference on Advances in Mechanistic Organic Chemistry is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Advances in Mechanistic Organic Chemistry. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Mechanistic organic chemistry
Chemical bonding, molecular orbital theory, and aromaticity
Unusual molecules: syntheses and properties
The use of isotopes in determining structure and reaction mechanisms.
Reactions of atomic carbon

Matrix isolation spectroscopy
Laser flash photolysis
Molecular modeling techniques
The influence of structure on reactivity: steric and electronic effects
The role of thermodynamics and kinetics in reactions, linear free energy relationships
