

# CALL FOR PAPERS

**ICCCFWSMC 2020**  
**Feb 10-11, 2020**  
**Barcelona, Spain**

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICCCFWSMC 2020 : International Conference on Cooperative Communications for Future Wireless Systems and Multicell Cooperation is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Cooperative Communications for Future Wireless Systems and Multicell Cooperation. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Interference coordination schemes  
Cell-free massive MIMO system  
Massive MIMO and millimeter-wave communication in the context of cooperative networks  
Multicell cooperation (centralized joint processing, distributed processing, etc.)

Cooperative interference alignment approaches  
Relay assisted schemes  
Cooperative physical layer security  
Cooperative non-orthogonal multiple access schemes
