

CALL FOR PAPERS

ICDSP 2020
Feb 10-11, 2020
Barcelona, Spain

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICDSP 2020 : International Conference on Digital Signal Processing is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Digital Signal Processing. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Array Signal Processing
Audio / Speech / Music Processing & Coding
Brain-Computer Interface
Biomedical Signal and Image Processing
Digital and Multirate Signal Processing
Digital Watermarking and Data Hiding
Genomic Signal Processing
Geophysical / Radar / Sonar Signal Processing
Image and Multidimensional Signal Processing
Image/Video Content Analysis
Image/ Video Indexing, Search and Retrieval
Image/Video Processing Techniques

Image/Video Compression & Coding Standards
Information Forensics and Security
Multidimensional Filters and Transforms
Multiresolution Signal Processing
Nonlinear Signals and Systems
Real-Time Signal/ Image/Video Processing
Signal and System Modelling
Signal Processing for Smart Sensor & Systems
Statistical Signal Processing
Theory and Applications of Transforms
Time-Frequency Analysis and Representation
VLSI Architectures & Implementations
