

CALL FOR PAPERS

Feb 10-11, 2020 Barcelona, Spain

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICDTSNAAAM 2020 : International Conference on Design and Theoretical Study of New Antennas and Antenna Arrays Measurement is

the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Design and Theoretical Study of New Antennas and Antenna Arrays Measurement. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

New materials for antennas and millimetre-wave systems Wideband antennas Antenna arrays MIMO and smart antennas Active and integrated antennas Adaptive and reconfigurable antennas
Antennas/antenna arrays for energy harvesting and scavenging
Antennas/antenna arrays
measurement
Advanced RF materials,
meta-materials, metasurfaces and
EBG
Antennas/antenna arrays for 5G
communications and the Internet of
Things
