

CALL FOR PAPERS

ICIAMA 2020
Feb 10-11, 2020
Barcelona, Spain

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICIAMA 2020 : International Conference on Industrial Applications of Materials and Analysis is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Industrial Applications of Materials and Analysis. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Materials science and engineering
Materials engineering and testing
Construction materials testing laboratories
Minimize material replacements
Reduce the likelihood of deterioration
Avoid potential failures
Investigate and evaluate materials-related problems
Industry-leading software for materials information management
Analysis
Management of metals and composites data
Materials in industry
Industrial applications of materials
Materials design

Industrial production of materials
Processing techniques
Extraction of materials and their conversion into useful forms
Extraction and purification techniques
Basic materials sector
Processing of raw materials
Mining and refining of metals, chemical producers and forestry products
Qualifying chemicals
Energy sources
Basic materials sector and economical shifts
Construction projects
Creation of new products
Foundry techniques
