

# CALL FOR PAPERS

**ICWDMGF 2020**  
**Feb 10-11, 2020**  
**Barcelona, Spain**

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICWDMGF 2020 : International Conference on Weibull Distribution and Moment Generating Function is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Weibull Distribution and Moment Generating Function. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Weibull distribution and analysis  
Weibull reliability function  
Reliability life data analysis  
Characteristics of the weibull distribution  
Connection with the exponential distribution  
The Weibull failure rates  
Bayesian-Weibull analysis  
Estimation of the Weibull parameters

The moment generating function  
Maximum likelihood estimation  
Probability plotting  
Posterior distributions for functions of parameters  
Effects of the shape parameter  
Effects of the location parameter  
Fisher matrix confidence bounds  
Financial applications for Weibull analysis
