

CALL FOR PAPERS

ICGTDA 2020
Feb 27-28, 2020
Buenos Aires, Argentina

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICGTDA 2020 : International Conference on Geospatial Technology and Data Analysis is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Geospatial Technology and Data Analysis. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Geospatial technology
Methodology
Global positioning systems
Remote sensing
Geographic information systems
Disaster risk management
Sustainable urban-regional
development
Land administration
Geomatics
Conservation and development
Visualization, measurement and
analysis
Trends in geospatial technology

Applications of geospatial
technology
Recent and emerging trends in
geospatial applications
Integration of geospatial
technologies
Advantages and benefits
Spectral reflectance signature
Digital image processing
Visual interpretation
Geographic information system data
element and data structure
Geographic information system data
analysis
Global positioning systems accuracy
and accuracy factors
Uses of GPS technologies
