The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICMRAM 2020: International Conference on Mining Robotics and Automated Mining is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Mining Robotics and Automated Mining. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

- Mining robots and robotics
- Robotics and automation in mining
- Radiological, survey, and inspection robots
- Current mine automation trends
- Robotics applied to current mining
- Automated mining
- Mine automation software
- Mining equipment automation
- Remote control
- Teleoperated mining equipment
- Driver assist
- Full automation
- Examples of autonomous mining equipment
