

CALL FOR PAPERS

ICSMC 2020
Feb 13-14, 2020
Istanbul, Turkey

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICSMC 2020 : International Conference on Sustainable Materials Chemistry is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Sustainable Materials Chemistry. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Sustainable materials chemistry
Energy and sustainable materials
Characterization methods of nanomaterials, photovoltaic materials and systems
Materials chemistry for energy
Energy, materials and chemistry
Chemical engineering applications for clean energy
Computational modelling of materials for the nuclear industry
Sustainable materials chemistry in developing areas
Sustainable materials chemistry for engineering applications
Scope and applications in pharmaceutical chemistry
Scope and applications in physical chemistry
Scope and applications in organometallic chemistry

Scope and applications in electrochemistry
Scope and applications in cluster chemistry
Scope and applications in clandestine chemistry
Scope and applications in amateur chemistry
Scope and applications in click chemistry
Scope and applications in cosmetic chemistry
Scope and applications in petro chemistry
Scope and applications in regenerative chemistry
Chemical kinetics of materials
Insilico chemical assessment
Scope and applications in combinatorial chemistry
Scope and applications in green chemistry
