

CALL FOR PAPERS

ICANOME 2020
Feb 10-11, 2020
Kuala Lumpur, Malaysia

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICANOME 2020 : International Conference on Applications of Nanotechnology, Ocean and Marine Engineering is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Applications of Nanotechnology, Ocean and Marine Engineering. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Micro/nano/bio-sensors for monitoring marine environments.
Technologies for pollution detection, mitigation, and remediation
Biocompatible and/or bioinspired nanomaterials
Material degradation and biotransformation
Environmental health and safety (EHS) of nanomaterials.
Nanomaterial performance in extreme environments.

Degradation of pollutants in marine environments
Nanomaterial transport across marine interfaces
Life-cycle analysis of marine nanomaterials
Effect of climate change on marine nanomaterials
Nanomaterial transport across marine interfaces
