

# CALL FOR PAPERS

**ICGSSSA 2020**  
**Feb 10-11, 2020**  
**Kuala Lumpur, Malaysia**

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICGSSSA 2020 : International Conference on Geotechnical Slope Stability and Slope Analysis is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Geotechnical Slope Stability and Slope Analysis. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Geotechnical slope stability  
Slope stability analysis  
Limit equilibrium analysis  
Analytical techniques: method of slices  
Swedish slip circle method of analysis  
Ordinary method of slices  
Modified bishop's method of analysis  
Lorimer's method  
Spencer's Method  
Sarma method  
Comparisons

Rock slope stability analysis  
Limit equilibrium analysis software  
Limit analysis  
Stereographic and kinematic analysis  
Rockfall simulators  
Numerical methods of analysis  
Continuum modelling  
Discontinuum modelling  
Hybrid/coupled modelling  
Rock mass classification
