

CALL FOR PAPERS

ICIGIR 2020
Feb 10-11, 2020
Kuala Lumpur, Malaysia

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICIGIR 2020 : International Conference on Isotope Geology, Isotopes and Radioactivity is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Isotope Geology, Isotopes and Radioactivity. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Isotope geology	Samarium-neodymium
Isotope geochemistry	Rhenium-osmium
Radiogenic isotope geochemistry	Noble gas isotopes
Lead-lead isotope geochemistry	Uranium-series isotopes
Strontium isotope geochemistry	Anthropogenic isotopes
Isotopes and radioactivity	Radioactive chains
The principles of radioactive dating	Dating by extinct radioactivity
Radiometric dating methods	Determining geologically useful radioactive decay constants
Cosmogenic isotopes	The geological timescale
Uncertainties and results of radiometric dating	The age of the Earth
Radiogenic isotope geochemistry	The cosmic timescale
Stable isotope geochemistry	Chemical geodynamics
Isotope geology and dynamic systems analysis
