

CALL FOR PAPERS

ICMTWCMW 2020
Feb 10-11, 2020
Kuala Lumpur, Malaysia

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICMTWCMW 2020 : International Conference on Millimeter and Terahertz Wireless Communications and Millimeter Waves is

the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Millimeter and Terahertz Wireless Communications and Millimeter Waves. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Communication techniques
Millimeter and terahertz wave
technology
Transmitter and receiver
architectures
The physical and the medium access
control (MAC) layers
Modulation waveforms and coding
Passive and active components
Antennas
Terrestrial links

Satellite communications
Personal, local, and wide area
wireless networks
The 5th generation of cellular
communication
Propagation in the atmospheric
medium and through the ionosphere
Weather conditions effects
(humidity, fog, haze, dust, rain,
etc.)
Frequency allocation and
standardization
Utilization of unlicensed bands
The 6th generation in the future
