

CALL FOR PAPERS

ICNAARS 2020
Feb 10-11, 2020
Kuala Lumpur, Malaysia

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICNAARS 2020 : International Conference on New Advances in Automotive Radar Systems is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of New Advances in Automotive Radar Systems. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Array signal processing in MIMO systems
Circuits and systems for automotive radars
Clutter suppression
High-resolution radar imaging
Mutual interference mitigation

Machine learning on automotive radars
Detection and tracking theory
Target classification
Waveform diversity and design
