

CALL FOR PAPERS

ICNNOM 2020
Feb 10-11, 2020
Kuala Lumpur, Malaysia

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICNNOM 2020 : International Conference on Nanotechnologies, Nanomaterials and Optoelectronic Materials is

the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Nanotechnologies, Nanomaterials and Optoelectronic Materials. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Nanotechnologies and nanomaterials

Advanced alloy materials

Biomaterials and applications

Catalytic materials and applications

Electronic materials and applications

Energy materials

Graphene and applications

Light emitting materials

Magnetism and magnetic materials

Materials synthesis and characterizations

Materials theory and principles

Molecular systems and applications

Nanostructures and nanomaterials

Optoelectronic materials

Oxide materials

Photovoltaics photocatalysis materials

Plasmonics and applications

Polymers and applications

Quantum matters and applications

Sensors and applications
