

CALL FOR PAPERS

ICRDTB 2020
Feb 10-11, 2020
Kuala Lumpur, Malaysia

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICRDTB 2020 : International Conference on Radioactive Decay and Theoretical Basis is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Radioactive Decay and Theoretical Basis. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Nuclear decay	Occurrence and applications
Radioactivity	Decay timing
Radioactive decay	Gamma decay
Radioactive substances	Alpha-particle decay
Radiation protection	Beta-particle decay
Types of radioactive decay	Positron decay
Energetics of radioactive decay	Electron capture
Universal law of radioactive decay	Neutron decay
One-decay process	Proton decay
Chain-decay processes	Internal conversion
Alternative decay modes	Energy-level diagrams
Changing decay rates	Characteristics of radioactive decay
Theoretical basis of decay phenomena	The decay constant
