

CALL FOR PAPERS

ICRLN 2020
Feb 10-11, 2020
Kuala Lumpur, Malaysia

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICRLN 2020 : International Conference on Robot Learning and Neurocybernetics is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Robot Learning and Neurocybernetics. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Robot learning	Optimization strategy
Neurocybernetics	Developmental robotics
On cybernetics, information processing and thinking	Memory and cognition systems
Perspectives in neurocybernetics	Cognitive systems for robotics
Machine learning	Artificial life
Robotics	Intelligent machines
Developmental robotics	Autonomous robots
Cognitive robotics	Intelligent computer network and systems
Evolutionary robotics	Neuroevolution
Parameter tuning	Neuroevolution and neural systems
Perceptual learning	Neuroevolution and neuroscience
Map learning	Neural science and engineering
Behavior learning	Genetic algorithms
