

CALL FOR PAPERS

ICWTM 2020
Feb 10-11, 2020
Kuala Lumpur, Malaysia

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICWTM 2020 : International Conference on Water Technology and Management is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Water Technology and Management. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Water Resources Planning and Management:
Water resources integrated management
Water resources sustainable development
Water resources and Environmental Management in Mega deltas
GIS and remote sensing applications
Impacts of global and regional climate change
Instrumentation and measurement
Watershed assessment and monitoring
Water quality and protection
Trans-boundary Water Conflict and cooperation Issues
Artificial recharge and active management of aquifers
Groundwater contamination and protection
Integrated coastal aquifer management

Groundwater Flow
Artificial recharge and active management of aquifers
Groundwater flow and contamination
Water quality assessment and protection
Hydraulics and Hydraulic Structures
Water distribution systems analysis
Water Demand/ Forecasting Water management, control and regulation
Erosion, scour and sediment transport
Maintenance and rehabilitation of hydraulic structures
Information Technology (IT) applications in Water
Infrastructure
Hydraulic monitoring, modeling and simulation
Water Treatment Technology
Wastewater reuse
