

# CALL FOR PAPERS

**ICGCT 2020**  
**Feb 06-07, 2020**  
**Lisbon, Portugal**

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICGCT 2020 : International Conference on Green Construction and Technology is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Green Construction and Technology. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

- |   |   |
|---|---|
| Green construction                            | Energy efficiency                             |
| Green building                                | Water efficiency                              |
| Sustainable building                          | Materials efficiency                          |
| Green construction materials and technologies | Indoor environmental quality enhancement      |
| Construction management                       | Operations and maintenance optimization       |
| Construction method and system                | Waste reduction                               |
| Reducing environmental impact                 | Cost and payoff                               |
| Goals of green building                       | Regulation and operation                      |
| Life cycle assessment                         | International frameworks and assessment tools |
| Siting and structure design efficiency        |   |
